Creation and Evolution

Important truths of faith found in Genesis which the Church requires us to accept:

- That matter was created out of nothing by God at the beginning of time.
- The creation of human beings—however human arose in history—was an act of special creation by God. God breathed a human soul into Adam.
- That woman is formed from the body of man, from his very self.
- That all humanity is descended from Adam and Eve.
- That Adam and Eve were created without sin.
- That Adam and Eve were commanded to be obedient to God.
- That Adam and Eve sinned against this command.
- That, as a result of that sin, our ancestors fell from their state of sinless innocence.
- That even at the time of the Fall, God made clear the promise of a future Redeemer.

The creation account in the Bible tells us God is the origin of the material which makes up the universe.
